Attachment: Memo to [REDACTED] information, C/GSD, dated 15 December 1964

25X1A

I think it would be appropriate if [REDACTED] working with ASD people, developed a program for the installation of [REDACTED] equipment on say the IDEALIST aircraft by about the first of February. If you don't think that enough information exists at this time so that this is possible, will you please let me know.
